

Delphinium grandiflorum

Summer

Blues®

Art.-Nr.: DG0201R

- FastraX perennial: First year flowering without vernalization
- Compact plant habit
- Perfect as mixture in containers

Crop Time	Frühjahr: 16 - 20 Wochen
Höhe ∅	35 cm
Standort	Sun - Partial shade
Seed Form	Roh
Heat Zone	6-1
Hardiness Zone	3b-7b
Best Uses	Beet und Balkon, Schnittblume, Landschaft

KULTURANLEITUNG

Delphinium grandiflorum Summer

Verwendung

Perennial, first year flowering. Bedding and border plants, pot and mixed containers.

Aussaattermin

December-May

Kornablage

2-3 seeds per plug

Keimbedingung

14-18 days at 68-72 °F (20-22 °C). Cover seed lightly and maintain constant humidity levels during Stage I.

Topfen

Transplant plugs 6-8 weeks after sowing into 3.5" (9 cm) to 1 quart (1 liter) containers. For larger containers, use 3 plants per pot. Avoid planting plugs too deep. Provide good ventilation. Begin fertilizing at 200 ppm nitrate nitrogen in a 2-1-2 ratio fertilizer mix. Avoid soluble salt buildups. Finish at temperatures of 45-75 °F (7-24 °C). Temperatures above 85 °F (29 °C) can cause flower abortion. Temperatures below 55 °F (13 °C) under short days will cause plants to form rosettes and will delay flowering. At lower temperatures, use extended day length or night interruption with incandescent lights to avoid rosette formation.

Medien

Use a well-drained media, pH: 5.8-6.5.

Temperatur

Grow at 13-16 °C or outdoors.

Düngung

Moderate fertilization levels are required.

Stage I Starts with the radicle breaking through the testa. The roots are touching the medium. Ends with fully developed cotyledons.

Stage II Starts from fully developed cotyledons. Ends with the fully developed true leaf or true leaf pair.

Stage III Starts from the fully developed true leaf or true leaf pair and ends with 80% of the young plants being marketable.

Stage IV All young plants are ready for sale and in the process of being hardened off. This stage lasts about 7 days.

The cultural recommendations are based on results from trials conducted under Central European conditions. Different conditions in other parts of the world may lead to deviations in results achieved.
