

Muhlenbergia reverchonii

Rosy

Art.-Nr.: MR0101R

- Dense, clump-forming plants with green foliage
- Reddish pink flowers float above the foliage
- Smaller in stature and softer blooms than Ruby
- Heat and drought tolerant
- Needs warmer temperatures for better flower initiation and lush blooms

Crop Time	Frühjahr: 14 - 16 Wochen
Höhe 	70 cm
Breite 	50 cm
Standort	Sun - Partial shade
Seed Form	Roh
Heat Zone	5-10
Hardiness Zone	5-10
Product Use	Landschaft
Foliage Color	Green
Plume Color	Pink

TECHNICAL GUIDE

Muhlenbergia reverchonii Rosy

Keimbedingung

7-14 days

Temperatur

70 °F / 21 °C

Stage I Starts with the radicle breaking through the testa. The roots are touching the medium. Ends with fully developed cotyledons.

Stage II Starts from fully developed cotyledons. Ends with the fully developed true leaf or true leaf pair.

Stage III Starts from the fully developed true leaf or true leaf pair and ends with 80% of the young plants being marketable.

Stage IV All young plants are ready for sale and in the process of being hardened off. This stage lasts about 7 days.

The cultural recommendations are based on results from trials conducted under Central European conditions. Different conditions in other parts of the world may lead to deviations in results achieved.
