

Eragrostis spectabilis

Snuggly

Art.-Nr.: ES0101P

- Coarsely-textured foliage with compact growth
- Drought tolerant, for sandy soils
- Showy, easy-care grass for landscape plantings
- Optimal storage: up to 6 months at 5 °C / 41 °F

Crop Time	Frühjahr: 12 - 14 Wochen
Höhe ☞	55 cm
Breite ☞	55 cm
Standort	Sun - Partial shade
Seed Form	BeGreen ApeX
Hardiness Zone	5-10
Product Use	Landschaft
Foliage Color	Green
Plume Color	Green

TECHNICAL GUIDE

Eragrostis spectabilis Snuggy

Kornablage

4-6 seeds per plug.

Keimbedingung

Optimum conditions for seedling development, beginning on the day of sowing until radicle emergence. Expect germination in 10-14 days.

Temperatur

Plug culture: 22-24 °C (72-76 °F) until radicle emergence, then reduce to 18-20 °C (64-68 °F) during day and night.

Growing on: Cooler temperatures promote a compact, round plant habit in pots. Warmer temperatures shorten the crop time.

Stage I Starts with the radicle breaking through the testa. The roots are touching the medium. Ends with fully developed cotyledons.

Stage II Starts from fully developed cotyledons. Ends with the fully developed true leaf or true leaf pair.

Stage III Starts from the fully developed true leaf or true leaf pair and ends with 80% of the young plants being marketable.

Stage IV All young plants are ready for sale and in the process of being hardened off. This stage lasts about 7 days.

The cultural recommendations are based on results from trials conducted under Central European conditions. Different conditions in other parts of the world may lead to deviations in results achieved.
